

Female German Roach with
Egg Case Attached

**DO YOU WANT THIS GIRL
VISITING YOUR PLACE?**

she's creepy, she's crawly, she's dirty, she contaminates food and she spreads disease, she's really yucky!

Don't tell anyone....but she just might already be there.

Roaches come out at night when you're probably not watching. And, they can carry disease and make people sick. If you'd like help with roaches or any pest problem GIVE US A CALL WE'VE BEEN SOLVING PEST PROBLEMS SINCE 1908.

Note: "Bug bombs" may make an infestation worse by killing exposed insects and spreading the rest. We have better solutions.
