

Moles

Paratex does not provide a service to eliminate moles.

We recommend two “do-it-yourself” products:

1. Uncle Ian’s Mole Repellent

This material is non-toxic and may be safely used around children and pets.

2. Talpirid Mole Bait

This is a poison bait in plastic worms designed to imitate the mole’s real food. It should only be used by responsible adults.

Both of these products work, although results are inconsistent. We can ship either by UPS.
