

**Quick Guide to
Pest Solutions**

Silverfish

If silverfish are present in a commercial location, including multifamily apartments, a routine schedule should be set up with residual treatments. This can be accomplished safely and cost-effectively. Call 800 542 1234 for a proposal.

Silverfish in a residence usually involves their being brought into the location in boxes or books from an infested apartment or commercial location. One or two treatments will usually eliminate this problem. Call for a quotation.

Boxes of books or papers may be brought into our vacuum vault and fumigated. This can be done without removing them from the boxes and there is no toxic residue after fumigation.
