

**Quick Guide to
Pest Solutions**

Clothes Moths

Paratex maintains a vacuum fumigation vault in South Seattle and **fumigation is the most effective way to eliminate clothes moths in carpets and woolen articles.**

Regular dry cleaning will also eliminate clothes moths in woolen suits and sweaters.

Clothes moths in a home are usually found in an area that is dark and undisturbed. In a carpet this may be under a sofa. Or it may be in an article that is stored away in a dark closet.

Adult moths are easy to kill with a household aerosol. It is the eggs and the larva that present a problem.

For severe infestations we recommend bring portable carpets and clothing to our vacuum vault for fumigation and the application of residual pesticides to the closets and infected areas in the home. It may also be advisable to monitor moth activity with pheromone traps.
