

Our Seattle Location has a Vacuum Fumigation Chamber Available to the Public

Our vacuum chamber is 24 ft long by 9 1/2 ft in diameter

Carpets and household goods routinely fumigated

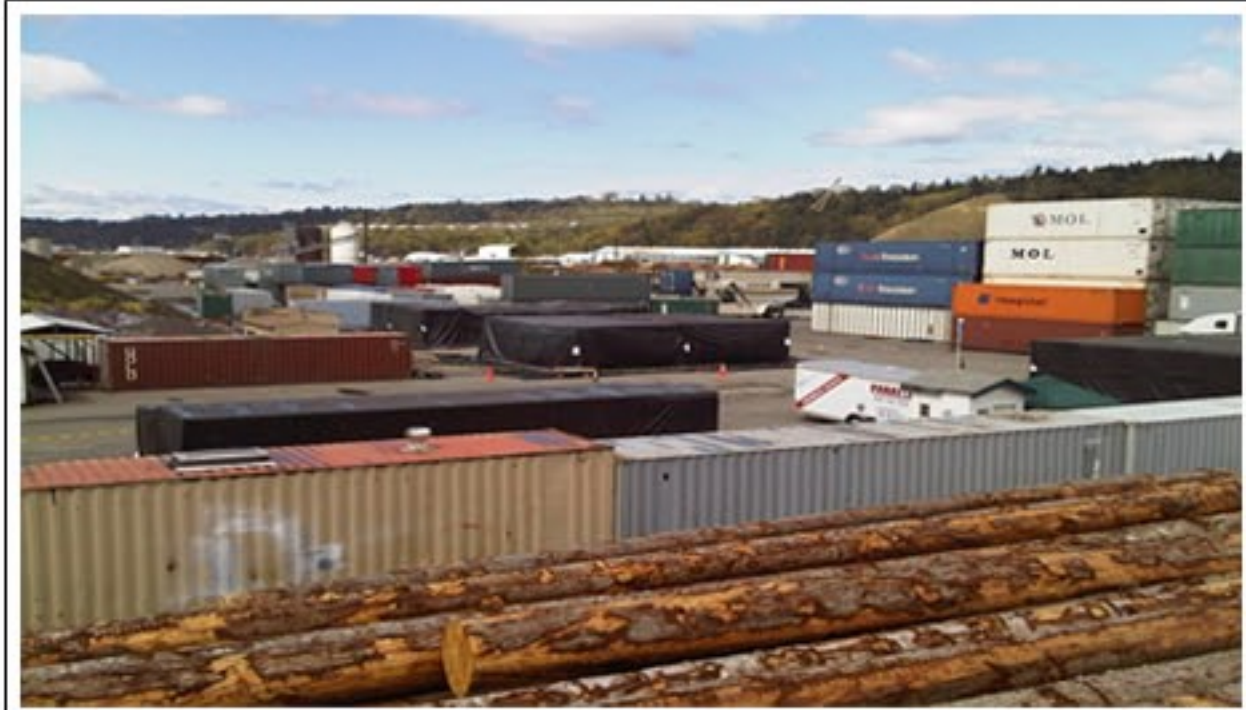

Historic totem pole fumigated to be sure there are no wood-destroying beetles.

While safe enough to eat lunch in the chamber after aeration, one employee retains her self-contained oxygen supply.

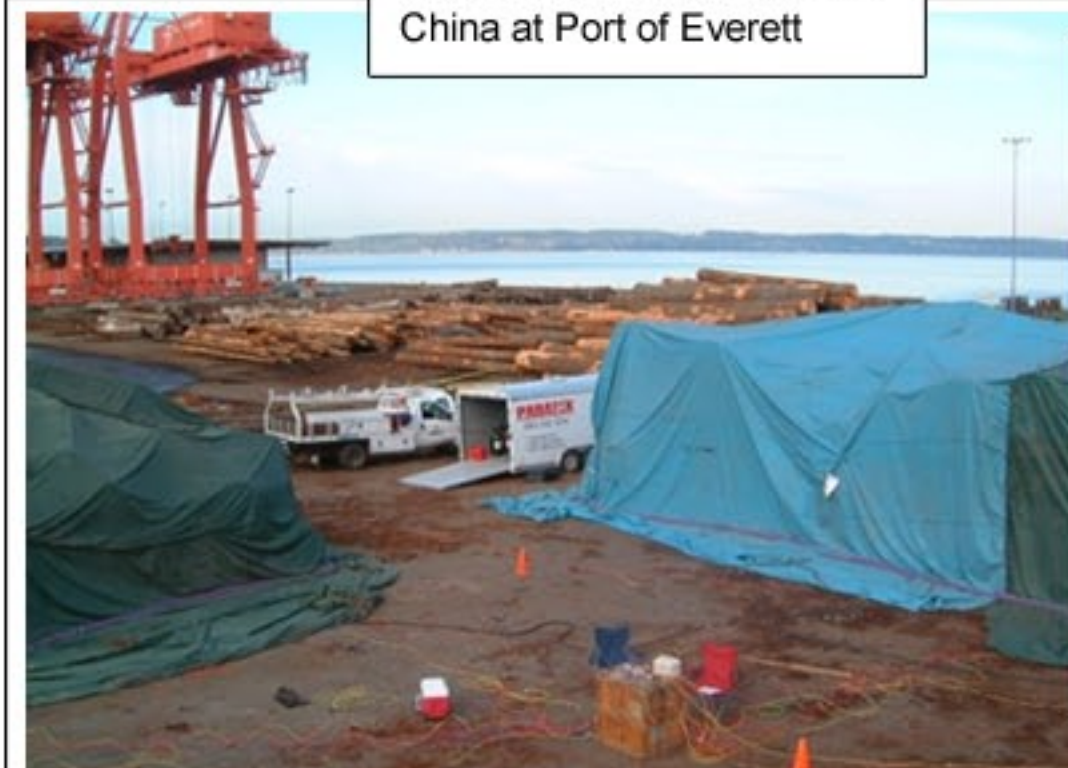

Paratex maintains a fumigation yard to fumigate ocean containers, both import and export, at 3701 Taylor Way in the Port of Tacoma

Containers under fumigation covered with nylon tarps and held tight with clips and sand snakes - Port of Tacoma

Fumigating logs for export to China at Port of Everett

Evaluating specifications with USDA and WSDA personnel

Preparing to fumigate logs for export at Port of Seattle

A POD with household goods is delivered to our Seattle office for fumigation to eliminate bedbugs.
