

**Quick Guide to
Pest Solutions**

Mites

Scabies (Itch Mite) – This is a medical condition. It can be treated with lotions. Consult a physician or pharmacist for direction.

Bird Mites/Rodent Mites – Occasionally mites will invade a home or building from a bird or rodent nest. We can provide a treatment if this happens. Call for a quotation. You may also want to consider the source of rodents and birds and have this problem eliminated.

House Dust Mites – Paratex does not provide a service to eliminate house dust mites. See 16bHouseDustMites in the information section for helpful hints.
